

**DOCTORAL CANDIDATES PRESENTATION DAY**  
***Curriculum: Life & Health Sciences***

- 9.00 Dr. D. Camilletti Innovative products to promote pulses consumption: Why, When, How
- 9.30 Dr. O.L. Cheng Analysis of gut microbiota variations in one African population
- 10.00 Dr. M.C. Ogwu Morphological evaluation of two members of *Senecio sect. Crociseris*, *Centaurea ambigua* group and *Centaurea arrigonii*
- 10.30 Dr. X. Suo The effect of formulation and processing on pasta quality
- 11.00 Dr. O. Gogoi Neuroprotective effect of the multifunctional protein p62 in Alzheimer's Disease
- 11.30 Dr. G. Pallotta Telemedicine for better health protection of remote patients
- 12.00 Dr. C. Salvesi Elderly people intestinal microbiota as a target for probiotic functional food intervention
- 12.30 Dr. G. Santini Evaluation of the variation of protein and vitamin content in high quality milk samples, subjected to different conditions of temperature and injected steam
- 13-14 LUNCH BREAK**
- 14.00 Dr. X. Huang Active graphene-based food packaging systems for a modern society: the GRAFOOD project. Step II
- 14.30 Dr. Y. Klimanova Evaluation of the effect of milk steam frothing on its chemical composition, texture and stability
- 15.00 Dr. L. Galosi Increased expression of apoptosis and autophagy markers in Cupped oysters (*Crassostrea gigas*) bred in the Middle Adriatic, during a period of mortality
- 15.30 Dr. G. G. Sagaro Telemedicine approach for identification and prevention of cardiovascular diseases among remote populations
- 16.00 Dr. A. Mancini Innovative computational approaches for the comprehension of mRNA intron retention
- 16.30 Dr. R. Botto Treatment of chronic osteoarthritis with micro-fractured adipose tissue graft in dog
- 17.00 Dr. R. Khuman Telemedicine systems in primary care & remote assistance - Part 1: Defining the framework
- 17.30 Dr. L. Vito How to simplify bioinformatics pipelines and machine learning processes
